Sustainability Score

Why?

Conscious Choices: Sustainability matters more than ever. Our platform should reflect it

Beyond Green: Sustainability isn't only environmental, it's social. Who can attend, and how freely, is part of it too.
So we include barrier-free access

How?

Honest by design: Measurable data (not vague labels, not measure carbon emissions)

45

Transit Access

35

Walk-in Access

20

Outdoor Venue

- ✦ *Dropped: free admission (98.9% free → no signal)*
- ✦ *Dropped: audience (different target ≠ less sustainable)*
- ✦ *Separate: wheelchair (98.6% "accessible" via bus → flagged, not scored)*

* **Level:**  ~ 

Ask MTLVerde

AI Chat Assistant — Powered by Anthropic's Claude API

- Natural conversation in English or French — no menus, no dropdowns.
- The Engine: Claude Sonnet
 - Called from our FastAPI backend, Claude turns raw event data into natural, human-sounding recommendations.

The /chat Endpoint — Three Jobs

Detect the language

- 1 Replies in the user's input language via the system prompt — even if the UI is set to the other one

Search the data

- 2 Keyword matching with a stopwords filter and a per-table quota

Tag the results

- 3 [id: EVENT_ID] tags in Claude's reply become live event cards on the frontend

Frontend — One shared hook: useEventChat.js

Floating Widget

Site-wide, above the Leaflet map

Survey Results

60% of respondents thought that Ask MTLVerde provided relevant events & festivals when asked.

53.8% of respondents used the Chatbot to ask questions.

From a scale of 1-5, **61.5%** of respondents rated sustainability as important (4 or 5) when choosing an event.

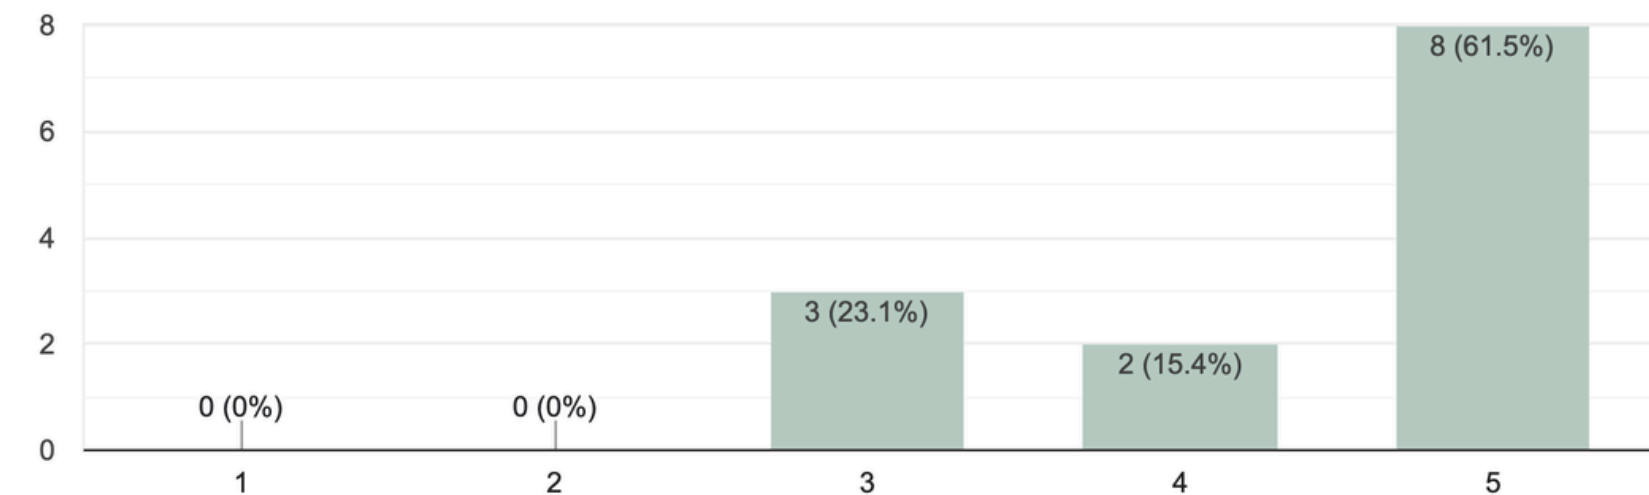

76.9% of respondents thought the eco-badge scoring system was self-explanatory.

Using the site, find a free event happening this weekend in your neighborhood. How easy was that?

Q

👤

🏠

Our North America Owned-or-Leased Footprint

While reducing our direct impact is the first priority, since 2007 we have purchased third-party verified carbon offsets for greenhouse gas emissions we have not been able to eliminate, and we also offset the emissions from our US business travel and employee commuting through projects that include protecting and restoring forests. We purchase Renewable Energy Certificates (RECs) to offset electricity consumption in our owned or leased buildings. Information on our carbon offsets can be found [here](#).
